

QUESTIONS TO ASK YOURSELF WHEN YOU WATCH A DEMONSTRATION OR ARE BEING GIVEN INSTRUCTIONS.

1. Was the aim / goal clear?
2. Could everyone see the instructor and the object being demonstrated?
3. Could the group have been arranged in a better way?
4. Did the instructor speak clearly and slowly?
5. Did the instructor display the object clearly?
6. Did the instructor use easy-to-understand, simple language?
7. Were complicated technical words explained well?
8. Did the instructor show and demonstrate clearly enough?
9. Was the process repeated?
10. Was the group asked lots of questions during the demo?
11. Did the instructor ask everyone questions, or did they just talk to one or two individuals?
12. Were the people in the group encouraged to be active?
13. Did the instructor keep everyone's interest? By looking around at everyone, by having an interesting voice and manner?
14. Was the lesson or demonstration arranged so that everyone felt successful and pleased with themselves?
15. Did the group feel eager to go on learning more?
16. Did the instructor check that the group could manage each part of the job as they went along? Too much all at once?
17. Was the instructor properly prepared? Were their tools and equipment ready?
18. Was the instructor practical and down to earth?
19. Was the situation realistic?
20. Was the goal reached? Could the group do the job?
21. Was there a summing-up at the end of the demonstration?
